IN THE CLAIMS:

1-28 (canceled)

- 29. (New) A greenhouse comprising: a substantially transparent surface; a protective coating comprising a pigment and a binder, the binder comprising a vinyl polymer based on one or more of the monomers selected from the group consisting of methyl methacrylate, butyl acrylate, 2-ethylhexyl acrylate, ethyl acrylate, styrene, methacrylic acid and acrylic acid, having a weight-average molecular weight of 10,000-100,000 and an acid value of 40-250, wherein the binder has a polydispersity of 2-6 and a glass transition temperature of 10 to 60 °C, and wherein the protective coating is on said substantially transparent surface and the protective coating is removable with a removing agent comprising a base and a complex former.
- 30. (New) The greenhouse according to claim 29, wherein the binder of the protective coating has a weight-average molecular weight of 15,000 to 75,000.
- 31. (New) The greenhouse according to claim 30, wherein the binder of the protective coating has a weight-average molecular weight of 20,000 to 50,000.
- 32. (New) The greenhouse according to claim 29, wherein the acid value of the binder of the protective coating is between 60 and 160.
- 33. (New) The greenhouse according to claim 29, wherein the glass transition temperature of the binder of the protective coating is between 20 and 50 °C.
- 34. (New) The greenhouse according to claim 29, wherein the binder of the protective coating is present in an amount of 4-60% by weight, based on the weight of the protective coating.
- 35. (New) The greenhouse according to claim 29, wherein the pigment of the protective coating is selected from the group of calcium carbonate, titanium oxide, a silicate, gypsum,

barite, and combinations thereof.

- 36. (New) The greenhouse according to claim 29, wherein the pigment of the protective coating is present in an amount of 30-95% by weight, based on the weight of the protective coating.
- 37. (New) The greenhouse according to claim 29, wherein the protective coating further comprises an adhesion promoter.
- 38. (New) The greenhouse according to claim 37, wherein the adhesion promoter is selected from the group of silanes.
- 39. (New) The greenhouse according to claim 29, wherein the protective coating further comprises a pigment divider.
- 40. (New) The greenhouse according to claim 29, wherein the protective coating further comprises a thickener.
